Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                            NUCLEAR RECEPTORS BY PROMOTING CHROMATIN CONDENSATION, THUS PREVENTING ACCESS OF THE BASAL TRANSCRIPTION.
SUBUNIT: FORMS A LARGE CORERESSOR COMPLEX THAT CONTAINS SIN3A/B AND HISTONE DEACETYLASE HEARD AND HEACT. THIS COMPLEX ASSOCIATES WITH THE THYROLD (TR) AND THE RETINOID ACID RECEPTORS (RAR) IN THE ABSENCE OF LIGAND, AND MAY STABILIZE THEIR INTERACTION WITH TFIIB. SUBCELLULAR LOCATION: NUCLEAR.
ALTERNATIVE PRODUCTS: 2 ISOFORMS; SMRT/TRAC-2 (SHOWN HERE) AND TRAC-1, ARE PRODUCED BY ALTERNATIVE SPLICING. TRAC-1, CONTAINS ONLY THE C-TERMINAL RECEPTOR-INTERACTING DOMAIN AND ACTS AS AN
                -!- FUNCTION: MEDIATES THE TRANSCRIPTIONAL REPRESSION ACTIVITY OF SOME
                                                                                                                                                                                                        ANTAREAGON.

TISSUE SPECIFICITY: UBIQUITOUS. HIGH LEVELS OF EXPRESSION ARE DETECTED IN LUNG, SPLEEN AND BRAIN.
INDUCTION: REGULATED DURING CELL CYCLE PROGRESSION
DOMAIN: THE N-TERMINAL REGION CONTAINS REPRESSION FUNCTIONS THAT
ARE DIVIDED INTO THREE INDEPENDANT REPRESSION DOMAINS (RDI, RD2
AND RD3): THE C-FERMINAL REGION CONTAINS THE UNCLEAR RECEPPOR-
INTERACTING DOMAINS THAT ARE DIVIDED IN TWO SEPRARTE INTERACTION
DOMAINS (IDI AND ID2).
SEQUENCE THE TWO INTERACTION DOMAINS (ID) CONTAIN A CONSERVED
SEQUENCE REPERRED TO AS THE CORRE BOX. THIS MOTIF IS REQUIRED AND
SUFFICIENT TO PERMIT BINDING TO UNLIGANDED TR AND RARS. SEQUENCES
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                SIMILARITY)

"Isolation of proteins that interact specifically with the retinoid X receptor: two novel orphan receptors.";

Mol. Endocrinol. 9:72-86(495).

-! FUNCTION: MEDIATES THE TRANSCRIPTIONAL REPRESSION ACTIVITY OF SOME NUCLEAR RECEPTORS BY PROMOTING CHROMATIN CONDENSATION, THUS PREVENTING ACCESS OF THE BAGAL TRANSCRIPTION.

-! SUBUNIT: FORMS A LARGE COREPRESSOR COMPLEX THAT CONTAINS SIN3A/B AND HISTONED DEACEFYLASES HDACI AND HDAC2. THIS COMPLEX ASSOCIATES WITH THE THYROID (TR) AND THE RETINOID ACID RECEPTORS (RAR) IN THE ABSENCE OF LIGAND.
                                                                                                                                                                                                                                                                                                                                                                                                                                      DOMAIN: THE TWO INTERACTION DOMAINS (ID) CONTAIN A CONSERVED SEQUENCE REFERRED TO AS THE CORN BOX. THIS MOTIF IS REQUIRED AND SUPFICIENT TO PERMIT BINDING TO UNLIGANDED TR AND RARS. SEQUENCES FLANKING THE CORNR BOX DETERMINE NUCLEAR HORMONE RECEPTOR
                                                                                                                                                                                                                                                                                 SUBCELLURAR LOCATION: NUCLEAR,
ALTERNATIVE PRODUCTS: 2 ISOFORMS; A LONG FORM (SHOWN HERE) AND A
ALTERNATIVE PRODUCTS: 2 ISOFORMS; A LONG FORM (SHOWN HERE) AND A
SHORT FORM; ARE PRODUCED BY ALTERNATIVE SPLICING.
TILSSUE SPECIFICITY: UBLOUITOUS.
DOMAIN: THE N-TERMINAL REGION CONTAINS REPRESSION FUNCTIONS THAT
ARE DIVIDED INTO THREE INDEPENDANT REPRESSION DOMAINS (RDI, RD2
AND RD3): THE C-TERMINAL REGION CONTAINS THE NUCLEAR RECEPTOR-
INTERACTING DOMAINS THAT ARE DIVIDED IN TWO SEPARATE INTERACTION
DOMAINS (IDI AND ID2):
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    (BY SIMILARITY)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       SIMILARITY: CONTAINS 1 SANT DOMAIN (COMPOSED OF SANT-A+SANT-B). SIMILARITY: CONTAINS 2 CORNR BOX. SIMILARITY: BELONGS TO THE N-COR NUCLEAR RECEPTOR COREPRESSORS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      MGD; MGI:1349717; Ncorl.
